Gentlemen:

RE: Supplemental Waste Stream #822889

As of July 5th, 1984, an emergency rule by the Illinois Pollution Control Board, prohibits the landfill disposal of liquid hazardous wastes. The emergency rules adopted are 35 Ill. Adm. Code Subtitle G Sec. 709 and 729. Copies of these rules were sent to all generators of hazardous waste which were permitted for land disposal with an informational letter that stated the need for the generators of liquid waste or residuals from the treatment of liquid hazardous waste to submit waste stream "authorization" applications to the Illinois EPA. Guidelines for the application are included in Subpart C of Sec. 709. This itemized list contains the minimal information required by the Board for Agency review until a standard application form is made available.

Upon receipt and review of the applications, the Agency found that a number of generators did not provide all of the necessary information outlined in Subpart C. Therefore, the Agency is contacting those generators that did not submit complete applications and informing them of the inadequacies.

The authorization application received from you is not considered to be satisfactory because little or none of the information as outlined in Sec. 709.301 was provided. (Note: A certification that the waste is not regulated by the rule does not qualify as an application for authorization.) As a result, the Agency is unable to initiate a proper review or to issue an authorization. A standardized form is enclosed. Please provide complete and accurate information. Particular attention should be paid to part A (10).

The information requested above is required to ensure that the generator has a correct and complete application on file with the Agency. In addition, in order to expedite review of these applications and subsequent authorizations, the Agency is requesting that the information be submitted by October 15, 1984.

Failure to submit the data required above may result in your waste being denied authorization for landfill disposal.

Very truly yours,

Eugene P. Theios, Manager  
Disposal Alternatives Unit  
Permit Section  
Division of Land Pollution Control
